

## Performance Scenarios

Investment £10,000 Scenarios (Excludes any impact of EIS tax reliefs)		1 year	3 years	5 years Recommended holding period
Stress scenario	What you might get back after costs	£0	£0	£0
	Average return each year	-100%	-100%	-100%
Unfavourable scenario	What you might get back after costs	£0	£500	£5,200
	Average return each year	-100%	-63%	-12%
Moderate scenario	What you might get back after costs	£0	£2,200	£16,100
	Average return each year	-100%	-40%	10%
Favourable scenario	What you might get back after costs	£0	£4,200	£28,460
	Average return each year	-100%	-25%	23%

Note: all figures in the tables are for illustration purposes only.

This table shows the money you could get back over the next five years, under different scenarios, assuming that you invest £10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the investment.

The figures shown include all costs of the product itself but may not include all costs that you pay to your advisor or distributor.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the recommended holding period. You will either be unable to cash in early, you may have high costs or make a large loss if you do so.

The figures do not take into account your personal tax situation, and therefore exclude any potential positive impact of EIS income tax and loss reliefs, which may also affect how much you get back. For example, if you pay income tax at the 40% marginal rate and are able to claim all income tax and loss reliefs available under EIS, for the same investment under both the Unfavourable and Moderate scenarios above, after 5 years the equivalent average return each year would be 5% and 25% respectively instead of -12% and 10%.

## What happens if Symvan Capital Limited is unable to pay out?

In the event of default by the Manager such that it is unable to carry out its obligations, the Manager shall endeavour to make appropriate arrangements to transfer the Fund to another fund manager. In the event of default by any of the Manager's appointed agents such as the Custodian (Woodside Corporate Services Limited), the Manager shall endeavour to appoint an alternative custodian.

Should you face a financial loss due to the Manager not being able to carry out its obligations, you may be able to claim compensation. The Manager participates in the Financial Services Compensation Scheme, established under the Financial Services and Markets Act 2000, which provides compensation to eligible investors in the event of a firm being unable to meet its customer liabilities. Payments under the protected investment business scheme are limited to a maximum of £85,000. Further information is available from the Financial Services Compensation Scheme, PO Box 300, Mitcheldean GL17 1DY.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. These figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## Costs over time

Investment £10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years (recommended)
Total costs	£0	£300	£2,900
Impact on return (RIY) per year	0%	2.6%	3.7%

The table shows what impact the different types of costs have on what you get back at the recommended holding period and under the Moderate scenario and what the different cost categories mean.

## Composition of costs

The table below shows a) The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and (b) What the different cost categories mean.

One-off costs	Entry costs	0%	The impact of the costs you pay when entering your investment.
	Exit costs	0%	The impact of the costs of exiting your investment when it matures.
Recurring costs	Portfolio transaction costs per year	0%	The impact of the costs of us buying and selling underlying investments for the product.
	Insurance costs	0%	Not applicable.
	Other ongoing costs	0%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	3.7%	The impact of the performance fee. We take these when realisations from a company investment exceed the total amount invested, that amount being 20% of the differential.
	Carried interests	0%	The impact of carried interests.

## How long should I hold it and can I take my money out early?

### Recommended holding period: 5 years or longer

The Fund will not invest in any company without a clear expectation of the likely exit strategy. The Fund will take a long-term view on the Portfolio Companies and will look at the possibility of facilitating an exit from an Investment after it has been held for at least three years, thereby ensuring, wherever possible, that the Investment has met one of the key conditions necessary for Investors to obtain the relevant tax reliefs. However, there may be occasions where an earlier sale is a commercially sensible decision.

It is anticipated that exits from investments in Portfolio Companies will take place after they have been held for at least four years though some could take longer (five to six years) depending on market conditions and the nature of the commercial development of each of the Portfolio Companies. Therefore, the recommended holding period for the Product is five years or longer.

The EIS rules do not permit investments to be withdrawn during the Three Year Period, as to do so would invalidate any claim for tax relief and would lead to relief needing to be repaid. Where an Investor wishes to withdraw their investment, under exceptional circumstances, such as the death of the Investor or proven severe financial hardship or proven health difficulties of the Investor, and without any guarantee of success, the Manager will try to match withdrawals with other shareholders and interested parties. However, it may not be practicable for the shares to be sold, in which case there will be a delay in completing the withdrawal and no guarantee can be given that any proposed matching will be successful or at what price it might be achieved. If a sale is made within the Three Year Period an Investor will lose their tax relief and could incur a loss on an investment.

Any completed withdrawals for a company investment that are realisations that exceed the total amount invested will incur a Performance Fee which will be deducted from the proceeds due to the Investor.

## How can I complain?

Should you have a complaint about the Product or the conduct of the Manager or the person advising on the Product, you should contact the Manager. If the Manager cannot resolve the complaint to your satisfaction, you may be entitled to refer the complaint to the Financial Ombudsman Service.

Further details of the complaints procedure can be found at <https://www.symvancapital.com/complaints-procedure>.

Complaints may be submitted either by post or email to the following addresses:

Symvan Capital Limited  
2 London Wall Place, 6th Floor  
London EC2Y 5AU
